What is a 12V sine wave inverter?

A 12V sine wave inverter is a device that converts DC power from a 12 volt battery or power source into AC power with a sine wave output. By using a 12V sine wave inverter, you can power AC devices and appliances using the DC power available from a 12 volt source.

Why do you need a sine wave inverter?

Most appliances in your home use AC power,so you need it to convert the DC power that solar panels produce to AC power. It also brings up the voltage to the grid level. A pure sine wave inverter also saves you money,as it's much more efficient than the older,jagged wave inverters.

What is a modified sine wave inverter?

Modified sine wave inverters and pure sine wave inverters are two types of power inverters. The main difference between them lies in the quality and characteristics of the AC waveform they produce.

Do you need a sine wave inverter for solar panels?

You need a pure sine wave inverterif you plan to install solar panels on your roof or RV. Most appliances in your home use AC power,so you need it to convert the DC power that solar panels produce to AC power. It also brings up the voltage to the grid level.

What is a 24V sine wave inverter?
