

How much are the subsidies for energy storage projects in the Netherlands

What is a EUR416 million subsidy?

The funds are part of a EUR416 million subsidy program announced last year to alleviate grid congestion. The authorities in the Netherlands have allocated EUR100 million in subsidies to the deployment of battery storage with solar projects for next year, as the country continues to struggle with a lack of power flexibility and grid limitations.

Why does Germany need a solar-plus-storage subsidy?

That compares to the effective 100% requirement that solar-plus-storage projects used to need in order to qualify for an investment tax credit (ITC) in the US, and still do for Germany's Innovation Tender. The subsidy is needed because BESS co-located with PV are 'not profitable', the government said.

What is the EUR100 million Bess scheme?

The EUR100 million (US\$106 million) allocation is part of a EUR416 million package for PV co-located battery energy storage system (BESS) technology that was initially to total EUR41.6 million a year, starting in 2025, for ten years. The 2025 programme is set to open on 1 January 2025, and more details will be released to the House later this year.

What are the laws & regulations on energy storage in the Netherlands?

No specific laws & regulations: In the Netherlands, energy storage is not described in Dutch laws and regulations as a specific item. Standard requirements: It has to meet standard requirements for production and consumption and some specific technologies that are part of the energy storage system must comply with standardisation.

How much does a kWh subsidy cost?

The initial estimate for the subsidy is EUR0.14-29 per kWh of energy discharged. Independent research and consultancy organisation CE Delft has been heavily involved in the analysis of the scheme until now.

Why do we need a Bess subsidy?

The subsidy is needed because BESS co-located with PV are 'not profitable', the government said. It expects the EUR100 million to be able to support the deployment of 160-330MW of BESS.

The government also grants subsidies in collaborative programmes, where companies or (social) organisations work together on a project. For example, ...

1. The analysis of subsidies allocated for energy storage initiatives in Hangzhou reveals crucial facets. These include financial backing amounting to substantial sums, intricate ...

How much are the subsidies for energy storage projects in the Netherlands
