

How often should the EMS of a communication base station be replaced

Do radio systems need maintenance and repair?

Radio systems require preventive maintenance and repair. Example of an EMS communication system using repeaters. Do not use phrases such as "be advised." These are implied and serve no purpose. Courtesy is assumed, so there is no need to say "Please," "Thank you," and "You're welcome."

How does an EMS system work?

In some EMS systems, simple standard communications are transmitted by pushing a button on a mobile data terminal (MDT) mounted in the ambulance. Carry portable radio whenever you leave unit. Report must be given to destination hospital so it can prepare for arrival.

How do you communicate with an EMS technician?

Give assessment information about your patient, but avoid offering a field diagnosis of the patient's problem. For example, say, "Patient complains of abdominal pain" rather than "Patient probably has appendicitis." Avoid slang or abbreviations that are not authorized. Use EMS frequencies for only authorized EMS communication.

What should an EMT say over the radio?

Say "Fifteen, one-five." Anything said over the radio can be heard by the public on a scanner. Do not use the patient's name over the radio. For the same reason, do not use profanities or statements that tend to slander any person. Use objective, impartial statements. Use "we" instead of "I." As an EMT, you will rarely be acting alone.

How do ambulances communicate?

Many transmissions are between the mobile radio within the ambulance and the dispatcher at a base station. In some EMS systems, simple standard communications are transmitted by pushing a button on a mobile data terminal (MDT) mounted in the ambulance. Carry portable radio whenever you leave unit.

How can EMS improve communication skills?

Interpersonal communication is often challenging in EMS. Adopting best practices can improve communication capabilities significantly. Confidentiality, patient refusals, and falsification of records are all-important legal concepts that an EMT must consider when documenting a call.
