

What is transmission & distribution in Lesotho?

Transmission and Distribution The role of Transmission and Distribution (T&D) is to provide safe and reliable electricity supply to Lesotho residents and businesses as a whole. The Transmission network evacuates power from the generation sources namely 'Muela Hydropower (LHDA), Eskom (South Africa) and EDM (Mozambique) to LEC load centres.

What is the electricity supply industry in Lesotho?

The electricity supply industry in Lesotho is dominated by two state owned entities, namely the Lesotho Electricity Company (LEC), which is the monopoly transmitter, distributor and supplier of electricity, and the Lesotho Highlands Development Authority (LHDA), which is the main generator of electricity through its 'Muela Hydro Power Station.

Who is responsible for the operation and maintenance of Lesotho electricity generation company?

The Lesotho Electricity Generation Company, as the operator of the project, will take over the operation and maintenance of the project after the completion of the project. At that time, the contractor plans to train the engineers of LEGCO in operation and maintenance so that they can be competent for the work.

How much electricity does Lesotho generate?

Lesotho currently generates electricity through the Muela Hydro Power Station which only provides 72MW and this is not enough to meet the country's base load estimated at 160MW. The situation is even worse during peak hours, especially in winter.

Who owns Lesotho electricity generation company (LegCo)?

The Lesotho Electricity Generation Company (LEGCO) is a company wholly owned by the Government of Lesotho. LEGCO was incorporated on the 29 th January 2020 as a public company under the Companies Act of 2011. It commenced its full operations on the 1 st September 2020.

Where does LEC supply 88kV to Lesotho?

The supply from Eskom (Clarence intake) enters Lesotho through 88kV line at Khukhune Substation in Butha-Buthe, while Qacha's Nek intake is through 22kV line from Matatiele. The transmission lines are of voltage levels 132kV, 88kV, 66kV and 33kV. However, there are places where LEC distributes with 33kV like Thabana Morena in Mafeteng.
