

Luxembourg home solar power system

Does Luxembourg need photovoltaics?

Luxembourg has an ambitious target to increase the share of energy from renewable sources to 25% by 2030. The development of photovoltaics is one of the solutions recommended in Luxembourg's integrated national energy and climate plan (PNEC, Predicted No-Effect Concentration).

What is Luxembourg's energy system like?

Luxembourg's energy system is characterised by high import dependence and reliance on fossil fuels. In 2018, 95% of its energy supply (100% of oil, natural gas and biofuels and 86% of electricity) were imported. It had the fourth-highest share of fossil fuels in TPES (78%) and the highest share of oil in TPES (60%) among IEA member countries.

Why should you choose a solar & thermal renovation company in Luxembourg?

Our integrated solutions help homeowners and businesses in Luxembourg reduce energy bills, increase property value, and achieve long-term sustainability. We guide you through every step - from design to installation - and assist with subsidies and tax incentives, making your switch to solar and thermal renovation smooth and affordable.

Is Luxembourg a space power?

Luxembourg first emerged as a potential space power five years ago. In February 2016, the Grand Duchy launched its Space Resources programme, a project to prepare for the future use of extraterrestrial minerals, water and gases to provide energy and materials for human activities beyond Earth.
