

Does Vietnam have new feed-in tariffs for solar power?

April 2025 | Southeast Asia Impact Alliance Vietnam is taking another step toward modernizing its renewable energy sector by unveiling updated feed-in tariffs (FiTs) for solar power, with a notable emphasis on encouraging battery energy storage systems (BESS).

What is a tariff rate in Vietnam?

Tariffs are taxes imposed on imported goods and services. Currently,the tariff rate for 20% applies to imports from Vietnam. This represents additional costs that importers pay when bringing goods into the United States from Vietnam. Furthermore,this rate can change based on trade agreements,economic conditions, and government policies.

What does Vietnam's Solar Policy update mean for energy storage?

Vietnam's solar policy update highlights growing roleof energy storage. (Photo: iStock) Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power,introducing location-based pricing and,for the first time,incorporating energy storage systems.

Why does northern Vietnam have higher feed-in tariffs?

While Northern Vietnam benefits from higher feed-in tariffs (FiTs) due to lower solar radiation, the overall system still operates on capped tariffs rather than market-based auctions. This may limit the agility of Vietnam's energy market in responding to investor needs and evolving technology costs.

What if importing goods from Vietnam is subject to 20% tariff?

When importing goods from Vietnam subject to the 20% tariff rate, businesses must ensure proper compliance with customs regulations.

Could Vietnam replace fixed feed-in tariffs with standardized auctions?

As global costs for solar, wind, and battery storage systems fall, Vietnam could replace fixed feed-in tariffs (FiTs) with standardized competitive auctions to procure clean energy at the lowest cost.

Tariffs on over 2/3 of all Chinese product imports (Section 301) 14% tariff on imports of solar modules and cells (for imports over 12.5 GW) from most countries (Section 201) Tariffs ...

With standard tariffs of 20% and transshipment tariffs of 40%, the trade landscape has fundamentally changed, affecting billions of dollars in ...

Vietnam tariffs impact the total cost of imported goods. Free Trade Agreements like EVFTA and CPTPP offer major tariff reductions. Accurate HS codes and proper ...

Vietnam has signalled openness to increasing imports of US agricultural products, but the scale of potential purchases is unlikely to significantly offset trade imbalances.

Trump has implemented new tariffs on China, increasing the cost of batteries - something Samsung SDI represents a potential opportunity for it.

US President Donald Trump has announced sweeping global tariffs on imports to the US, which have impacted solar PV manufacturing regions.

Explore the U.S. solar tariffs 2025 and their impact on solar costs and battery storage in the Texas solar market.

As global costs for solar, wind, and battery storage systems fall, Vietnam could replace fixed feed-in tariffs (FiTs) with standardized competitive ...

Learn how to navigate the complexities of importing lithium batteries to the US with our detailed guide. Stay informed. Stay compliant. ...

We analyze the business implications of Decision 988/QD-BCT, which revises Vietnam's feed-in tariff (FiT) rates for solar power projects.

As global costs for solar, wind, and battery storage systems fall, Vietnam could replace fixed feed-in tariffs (FiTs) with standardized competitive auctions to procure clean ...

Trump"s reciprocal tariffs are expected to raise energy costs broadly across technology types and solar is no exception. The solar industry is quite ...

We provide an overview of Trump's tariff measures targeting Vietnam and examine their potential implications for the Vietnamese market.

In April 2025, the U.S. announced a 46% tariff on a range of Vietnamese imports, citing trade imbalances and concerns about Chinese goods being rerouted ...

Includes information on average tariff rates and types that U.S. firms should be aware of when exporting to the market.

For projects without battery storage, the tariff will be VND 1,382.7 (\$0.053)/kWh for the northern part of the country, VDN 1,107.1/kWh for the ...

Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based ...

Moreover, the administration has raised import tariffs on battery cells from China used in electric vehicles and energy storage systems.

What is Vietnam 2025 tariff schedule? How can you look up tariff rates? To find out, check out the article by TTL Global Logistics

Section 301 Tariffs for Batteries Are Changing Since 1974, Section 301 of the Trade Act has imposed tariffs and other trade barriers on imports ...

Vietnam is taking another step toward modernizing its renewable energy sector by unveiling updated feed-in tariffs (FiTs) for solar power, with a ...

The threat of tariffs on countries that supplied more than \$10 billion of solar products to the United States last year, accounting for the vast majority of domestic supplies, ...

Currently, the tariff rate for 20% applies to imports from Vietnam. This represents additional costs that importers pay when bringing goods into ...

Vietnam is taking another step toward modernizing its renewable energy sector by unveiling updated feed-in tariffs (FiTs) for solar power, with a notable emphasis on ...

Currently, the tariff rate for 20% applies to imports from Vietnam. This represents additional costs that importers pay when bringing goods into the United States from Vietnam. ...

Vietnam's trade ministry also announced additional provisional deals by Vietnamese and U.S. firms for the import of energy equipment, ...

Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, ...
